### EDUCATION

2022 - 2026

SARVAJANIK COLLEGE OF ENGINEERING AND TECHNOLOGY , SURAT

- Pursuing Computer Engineering (CGPA - 9.4 )

2020 - 2022

C.C. SHAH SARVANJANIK ENGLISH HIGH SCHOOL,SURAT.

- Higher Secondary School Certificate (83%)

2018 - 2020

S. D. R. UMRIGAR MEMORIAL SCHOOL, SURAT

- Secondary School Certificate (87% )

### TECHNICAL SKILLS

- Advance Python
- React Knowledge
- Proficient in Front-end Development
- Intermediate Knowledge of DSA
- Git - GitHub knowledge
- Exploring AI-ML Concepts
- C/Java - Competent
- Working Knowledge of SQL(Oracle)
- Skilled in Data Science & Analysis

### PROFILE

Computer Engineering student with a strong foundation in front-end and full-stack development. Experienced in building responsive, user-focused web applications using React and Tailwind CSS. Passionate about data visualization and leveraging technology to develop impactful, real-world solutions.

### PROJECTS

#### Portfolio Website

Developed a responsive personal portfolio using React, Vite, and Tailwind CSS with a dark/light theme and interactive animations. Integrated EmailJS for direct communication and optimized performance for smooth user experience.

#### BlogNest

Built a React-based blogging platform with Appwrite backend enabling users to post, edit, and manage blogs seamlessly. Designed a clean, responsive UI using Tailwind CSS for better readability and engagement.

#### Movie Recommendation System

Developed a Python-based movie recommender using Markov Decision Processes (MDP) and value iteration. Enhanced accuracy by modeling genre transitions for data-driven movie suggestions.

#### Chatify

Created a real-time chat app using PHP, MySQL, and JavaScript, supporting one-to-one messaging with session-based login. Focused on simplicity, security, and responsive design for a smooth communication experience.

#### Exoplanet Explorer Website

Designed an educational web app visualizing NASA's exoplanet data using HTML, CSS, and JavaScript. Implemented planet-specific detail pages and engaging visual interactions for better exploration.

#### Various Small Projects

- Working on a **Expense Split & Management** Application
- Develop a **Sudoku Solver** using Java and JavaFx effects.
- Used **beautiful soup** for **scraping** & extracting data from a website and analyzing data for future prediction & decision
- Made an front - end view of **amazon website** using HTML / CSS.

### LANGUAGES

- English (Intermediate)
- Hindi (Fluent)
- Gujarati (Fluent - Native)
